Continuous Delivery Foundation

CD FOUNDATION

ACCELERATING SOFTWARE DELIVERY WITH OPEN SOURCE

Our mission is to improve the world's capacity to deliver software with security and speed. We help our members leverage open source on their way to becoming high-performing software delivery organizations.

Our Innovative Members are Shaping the Industry

Our member organizations are enterprises, end users, vendors, start-ups, and other organizations who are committed to collaborating in open source and recognize that Continuous Delivery is a key differentiator. We are grateful for their support in advancing our mission.

Whether you are using, selling, or creating Continuous Delivery technologies, your membership at the Continuous Delivery Foundation grants you unfettered access to proven methodologies, real-time innovation, and a seat at the table to steer the conversation.

See our current **projects** and **members**, shaping the future of CD.

Membership Levels

Contact us for more information.

PREMIER $100,000	END USER $2,500 – $15,000*	GENERAL $5,000 – $30,000*
Tailored for any organization aiming to maximize their strategic involvement in driving the future of continuous delivery.	Geared towards organizations that do not sell CD-related services and who want to primarily participate in our end user council.	Suitable for start-ups, and organizations with a general interest in participation and contribution.

Associate Membership

We also have an Associate Membership for non-profits, universities, open source projects, and government entities.

Note: CDF membership also requires companies to be corporate members of the Linux Foundation (at any level).

* Fees scale based on the number of employees. See the table on the last page.
